Dear Bedfordale Volunteer Bushfire Service,

THIS IS TO CERTIFY THAT

Miss Haylee Field is suffering from both seizures and paralysis/weakness in her legs. This is all part of a collective group of new physical conditions she has developed. None of her conditions are dangerous in themselves, and she should just receive general support if she were to develop any troublesome symptoms whilst she is at your service. For example:

- if a seizure occurs, allow her to lie quietly on her side and provide a small pillow. Please call Mum if she has back to back seizures. She doesn't need an ambulance.

- if she develops paralysis of a limb, please allow her to sit/lie quietly. If she requires to be moved, please ask Haylee for her permission to do so.

Thank you for your support during this time. Haylee is very knowledgeable about her own condition and is happy for you to discuss how to manage her symptoms during a session.

Yours Sincerely,

Dr Lisa Booth MBCHB, FRACGP
