6.0 HAZARD REDUCTION BURNS 9
8.0 PROBATIONARY PERIOD REVIEW 10

1.0 Introduction

The Probationary Skill Log Book is intended as a reference guide to ensure you achieve all the appropriate competencies and technical experience during your probationary period. It is not intended as a test; however each item should only be completed when you are able to demonstrate your competency in the task.

Responsibility for completing the items within this Probationary Skill Log Book remains with you and your mentor and you should carry it with you at all times when attending Brigade activities to allow it to be completed as required.

Individual items within this Probationary Skill Log Book may be signed off by Senior Firefighter, Crew Leader and/or an Officer of your Brigade; however, final completion shall be done during a review of your probationary period. The Probationary period reviews shall be conducted in the presence of yourself; you're Mentor; the Brigade Training Officer; and Brigade Captain (or their nominated representatives).

Following successful completion of this Probationary Skill Log Book and the Probationary period review your probationary period will end and at the next Brigade Monthly Meeting your promotion will be announced by the Brigade Captain.

Should you have any queries relating to your role as a probationary member, your probationary period, this log book or any items listed within it you should contact your Mentor in the first instance. If you are unable to contact your Mentor you should contact a Brigade Officer, the Training Officer or the Brigade Captain.

2.0 Operational Incident Safety

L.A.C.E.S is used by all Fire Fighters to prevent situations arising where their safety is threatened

L – Lookout: Establish lookouts and task all crew members to be alert. All fire fighters must evaluate and re-evaluate their situation and have the ability to initiate communications should their environment change threatening their safety.

A – Awareness: Remain aware of the situation including current and potential weather, terrain and aspects, fuel types and fuel loads, hazards and crew locations. All personnel have a responsibility to be alert and act decisively before situations become critical.

C – Communications: Stay in communication with your people, communicate changes in situation, provide regular updates and use briefing procedures (SMEAC).

E – Escape Routes: Know your escape route at all times and ensure your colleagues are also fully informed. Vehicles must be positioned to allow for rapid escape.

S – Safety Zone: Always have a safety zone (anchor point) to which you can retreat if the situation changes. For example in a bushfire, well burnt ground may offer a safe area however; consideration must be given to ensure the Safety Zone is large enough.

These safety initiatives need to be understood and correctly initiated by all involved in managing emergency response operations.

3.0 Communications

3.1 WAERN Radio

Task	Competent (YES)	Date
Turn radio on		
Check to see radio on right channel		
Change to repeater channel		
Change to simplex channel		
Communicate via radio		
Change band on radio		
Perform Select Call on radio		
Adjust volume on radio		

3.2 General

Task	Competent (YES)	Date
Complete T-Card		
Identify phone number for Captain		
Locate address using Street-smart		
Locate address using ESD		

4.0 General skills

4.1 Fire Hydrant

Task	Competent (YES)	Date
Locate a Street Hydrant		
Set-up Standpipe and fill appliance		
Service Street Hydrant		

4.2 Hand Tools

Task	Competent (YES)	Date
Use rake hoe to establish mineral earth break		
Service rake hoe and axe		
Operate knapsack		

4.3 Drip Torch

Task	Competent (YES)	Date
Operate Drip Torch		
Refuel Drip Torch		
Store Drip Torch		

4.4 Hose and Hose Fittings

Task	Competent (YES)	Date
I.D. different hose size/types and their uses		
Lay out a length of flaked hose		
Lay out a length of Dutch rolled hose		
Lay out a length of Centre rolled hose		
Make up a length of flaked hose		
Make up a length of Dutch rolled hose		
Make up a length of Centre rolled hose		
Make up a damaged hose		
Operate a hose branch (Inc. correct stance)		
Change between Jet/Fog on branch		
Adjust water volume on branch		
Back-up another member on a hose		
Signal Water On		
Signal Water up one bar		
Signal Water Off		
Connect hose to appliance		
Operate Stortz coupling		
Connect lay-flat hose to extend hose reel		

5.0 Fire Appliance

5.1 LT

Task	Competent (YES)	Date
Perform Routine Inspection		
Disconnect appliance charging system		
Operate Lights & Siren Controls		
Operate Emergency Lights Only		
Operate PA system		
Operate rear speaker switch (radio)		
Start Pump Engine		
Stop Pump Engine		
Operate Water Recirculate Valve		
Locate and Clean Water Tank Filter		
Operate Hose Reel (including Isolation Valve and rewind hose)		
Isolate Side & Front Protection Hose		
Operate foam system		
Refill foam drums (Inc. replacing)		
Flush foam from system		
Locate Standpipe, Valve Key and Collector hose		
Refill Water Tank from Hydrant		
Refuel Pump		
Draft water from static water supply		
Refuel vehicle (Inc. use of fuel card)		
Change tyre		

5.2 3.4 Urban/Rural

Task	Competent (YES)	Date
Perform Routine Inspection		
Disconnect appliance charging system		
Operate Lights & Siren Controls		
Operate Emergency Lights Only		
Operate PA system		
Operate Intercom system (front & rear)		
Operate rear speaker switch (radio)		
Engage Pump at Master Panel		
Operate Auxiliary Pump		
Operate Hose Reels (Inc. Isolation Valve and rewind hose)		
Operate Deck Monitors & hoses (Inc. Isolation valves)		
Operate/isolate auxiliary pump		
Operate foam system		
Refill foam drums (Inc. replacing)		
Flush foam from system		
Refill Water Tank from Hydrant		
Refuel Auxiliary Pump		
Draft water from static water supply		
Locate Standpipe, Valve Key and Collector hose		
Refuel vehicle (Inc. use of fuel card)		
Change tyre		

6.0 Hazard Reduction Burns

As part of the requirements to complete the Probationary Period, you must attend at least 1 brigade hazard reduction burn, small fires including car fires and mopping up at larger incidents before attending major running fires.

This section should be completed by the Officer on Charge (OIC) immediately following completion of the Incident or Hazard Reduction Burn and should include the location and duration the probationary member spent on site.

OIC Name	OIC Signature	Date	Location	Duration (Hrs)

8.0 Probationary Period Review

Following the successful completion of this Probationary Skill Log Book and the probationary period review your probationary period will end and at the next Brigade Monthly Meeting and your promotion will be announced by the Brigade Captain.
